## EXPERIENCE

### FullStack Developer , WOORTON / B2C2

Nov 2023 – Present | Paris, France

- Designed and developed a crypto trading web application from scratch using **React.js**, **Redux**, **Bootstrap**, **TypeScript**, **REST APIs**, and **WebSocket**.
- Built high-fidelity mockups in **Figma** and implemented **unit & end-to-end testing**.
- Improved platform performance, scalability, and security.
- Led API rebranding and documentation post-acquisition to align with Woorton's identity.
- Enhanced internal tools with **Node.js** and **TypeScript**, improving operational workflows.

### Full Stack Developer, WOORTON

Nov 2021 – Oct 2023 | Paris, France

- Rebuilt an entire cryptocurrency trading platform, migrating from **Vue.js** to **React.js**.
- Delivered a modernized UI with better ergonomics and optimized performance/security.
- Collaborated with traders to design features tailored for high-volume real-time trading.

### Freelance Software Developer

Feb 2021 – Oct 2021

- Built custom websites and mobile applications for individual clients.
- Delivered tailored solutions using **React Native**, **Node.js**, and **SQL**.

### Web Developer, FIRE SOFTWARE

Aug 2017 – May 2018

- Developed a management system for a national travel agency using **PHP**, **MySQL**, **HTML**, **CSS**.
- Improved workflows and reduced manual workload by digitizing core operations.
